Message indicator

The message indicator on the handset can indicate unit status, as explained below.

Indicator	Status
Flashing rapidly	– Outside call or intercom call is being received or on hold. – The handset alarm is sounding.
Flashing slowly	– There are new messages. – There are new voicemails. – There are missed calls.

Setting the message indicator

You can enable and disable the message indicator for each type of status.
- "Incoming call" (default: On)
- "New message" (default: On)
- "New VM" (default: On)
- "Missed call" (default: Off)
- "Alarm" (default: On) (handset only)

This feature can be set for each unit.

1 For handset: [MENU] # 2 7 8

2 [▲▼]: Select the desired setting and press [SELECT].
- "✔" is displayed next to enabled items.
- To disable an item, select it and press [SELECT] again. "✔" disappears.

3 [SAVE] → [OFF]

Note:
- If the message indicator flashes when the handset is not placed on the base unit, the handset consumes battery power faster than usual.
