

# Technics Audio Player Installation Guide

## File structure of this software

Compressed archive file for distribution: technics\_audio\_player\_mac\_\*\_\*\_\*.zip (“\*” stands for a numeric character.)

This distribution contains the following files.

“Technics Audio Player for Mac”                      Archive folder for Mac  
    ▪ TechnicsAudioPlayer(Mac)Ver\*.\*.\*.zip    Compressed file for Mac Audio Player (“\*” stands for a numeric character.)

## Installation instruction

First, double-click to unzip “technics\_audio\_player\_mac\_\*\_\*\_\*.zip” (“\*” stands for a numeric character.) that is distributed as a compressed archive file. Next, double-click the “TechnicsAudioPlayer(Mac)Ver\*\_\*\_\*.zip” (“\*” stands for a numeric character.) in the Technics Audio Player for Mac folder. The Technics Audio Player application icon will be displayed.

Drag-and-drop the icon for the displayed application to your favourite place.

For instructions on how to use the software, read the manual (TechnicsAudioPlayer\_UserGuide.pdf) in the Technics Audio Player for Mac folder.

### **Note:**

If the Gatekeeper setting is anything other than “Allow applications download from anywhere”, warning message will display. In this case, click [OK] to close the warning message.

And control-click the file and choose [Open] from the menu. When the warning message displays, click the [Open] button.

If a warning appears when using the application on macOS 15 or later, please go to "System Settings" > "Privacy & Security," then locate the "Security" section. Find the entry for "TechnicsAudioPlayer.app" and click the "Open Anyway" button. If a confirmation dialog appears afterward, select "Open" again.

## Important points

- The corresponding sampling frequency and the number of quantization bits of the music files to play are limited to the specifications of the product to which you want to connect. Please read the product shipped with the instruction manual for connection details.
