Installation instruction

Please unzip the distributed file “technics_audio_player_win_**_**_**.zip” (“**” stands for a numeric character.) by right-clicking it and selecting ‘Extract All...’, or by using another extraction method.

After extraction, please copy the created “Technics Audio Player for Windows” folder to the desktop or your favorite place on the PC (by drag-and-drop).

For instructions on how to use the software, read the manual (TechnicsAudioPlayer_UserGuide.pdf)

Note:

- If you use this software in connection with the Technics products, you will need a dedicated USB driver from <https://www.technics.com/support/>.
- This software will not run if you copy only executable file (TechnicsAudioPlayer.exe) to any location. Be sure to copy and use all the files in the Technics Audio Player for Windows folder.

Important points

- The corresponding sampling frequency and the number of quantization bits of the music files to play are limited to the specifications of the product to which you want to connect. Please read the product shipped with the instruction manual for connection details.
